SUMMARY

IT student with strong interests in frontend development, UI clarity, and product quality. I enjoy combining clean interface design, structured development, and QA thinking to create digital experiences that feel intuitive, stable, and user-friendly.

Passionate about learning modern technologies, improving user experience, and continuously exploring how design and functionality can work together to solve real problems.

PROFESSIONAL EXPERIENCE

Instrument Tech, Morcelle Program

2025

QA TESTING PRACTICE

Self Learning Project

- Performed manual testing and functional validation on LMS-related modules.
- Created structured bug reports and testing documentation using QA workflows.
- Improved understanding of user flows, edge cases, and feature stability.
- Practiced regression testing to ensure consistent functionality after updates.

PROJECTS

Web Destinasi Wisata

2024

Frontend Developer

- Developed a responsive tourism recommendation website using React and TailwindCSS.
- Focused on improving navigation clarity and comfortable browsing experience.
- Implemented structured layouts and responsive components for better accessibility.
- Learned how UI hierarchy and frontend structure affect overall user experience.

Tech Stack: ReactJS, TailwindCSS, GitHub

PERSONAL PORTFOLIO WEBSITE

2026

Personal Branding Project

- Redesigned and rebuilt personal portfolio website with a modern UI approach.
- Added dark mode, responsive layouts, and smooth interaction animations.
- Focused on balancing visual presentation with clean component structure.
- Learned component-based development and frontend optimization practices.

Tech Stack: ReactJS, TailwindCSS, Vercel
