Portfolio: [Portfolio Website](#)

### SUMMARY

IT student with strong interests in frontend development, UI clarity, and product quality. I enjoy combining clean interface design, structured development, and QA thinking to create digital experiences that feel intuitive, stable, and user-friendly.  
Passionate about learning modern technologies, improving user experience, and continuously exploring how design and functionality can work together to solve real problems.

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                         |                       |
